Summary

Information Science engineering student currently in the third year with experience in web development, machine learning & data structures and algorithms. Skilled in building full-stack web applications and developing ML-based projects.

Education

BE in Computer Science

Visvesvaraya Technological University

Aug 2023 — Aug 2027

High School

J.B.P.I.C. , Ambedkar Nagar, U.P.

Mar 2020 — Mar 2021

Pre University

J.B.P.I.C. , Ambedkar Nagar, U.P.

Mar 2022 — Mar 2023

Technical Skills

Python, HTML5, CSS3, JavaScript, C, C++, Java, React.js, Node.js, MongoDB, MySQL, Git & GitHub Version Control

Additional Skills

Problem Solving, Machine Learning Fundamentals (Data Preprocessing, Model Training, Evaluation), Data Analysis using Python (Pandas, NumPy, Scikit-learn), Open Source Contribution, UI/UX Design Principles, Research

Languages

English, Hindi

Certifications

- Career Essentials in GitHub Professional Certificate - GitHub
- Responsive Web Design Certification - FreeCodeCamp
- LinkedIn Skill Assessment – Frontend Development
- Complete web development course - Udemy
- Basics of Artificial Intelligence - Coursera

Work Experience

GSSoC – Open Source

Contributor

Contributed to open-source web projects, improving UI, fixing layouts, and enhancing responsiveness through GitHub collaboration.

- Improved AgriLearnNetwork footer and optimized Food Ordering Website responsiveness.
- Contributed through GitHub pull requests and open-source collaboration.

Freelancing

Self-Employed

Worked on freelance web development projects, building responsive websites, improving UI/UX, and delivering functional web applications.

- Completed 7 freelance web projects (2 full-stack, 3 frontend, 2 UI design).
- Built responsive interfaces using HTML, CSS, and JavaScript.
- Collaborated with clients and optimized layouts for performance and compatibility.

Personal Project

Founder / Full-Stack Developer

Built DRSDriven, an end-to-end Formula 1 analytics platform delivering race insights, driver statistics, and interactive dashboards.

- Developed an end-to-end full-stack platform with frontend, backend, and data visualization.
- Built responsive UI and dashboards for Formula 1 analytics.
- Processed motorsport data to generate race insights and visual analysis.

Projects

DRSDriven

<https://drsdreven.vercel.app/>

End-to-end Formula 1 analytics platform providing interactive race insights, driver statistics, and data visualizations.

- Built a full-stack platform with interactive race analytics dashboards.
- Designed responsive UI and dynamic data visualizations.

WKYL

<https://github.com/anurag-jaiswal-aj/wkyl>

Web-based planner application designed to help users organize tasks, schedules, and daily activities through an interactive interface.

- Built an interactive task and schedule planner interface.
- Designed a responsive and intuitive UI for event management.

Paperless

<https://github.com/anurag-jaiswal-aj/paperless>

Digital document submission and management platform designed to streamline the process of collecting and organizing documents online.

- Built a form-based interface for document submission and organization.
- Designed a responsive, user-friendly UI for easy data entry.
